

# Job Description: Software Developer

**Position:** Software Developer

**Job Type:** Full-Time

**Location:** On-site / Remote

## Job Summary

We are looking for a motivated Software Developer with strong programming fundamentals. The candidate should be skilled in multiple programming languages and capable of developing, testing, and maintaining software applications.

## Required Programming Languages

- Python – scripting, automation, data processing, backend development
- Java – object-oriented programming, enterprise applications
- JavaScript – frontend and backend development
- SQL – database design, queries, and optimization
- HTML & CSS – basic web interface development
- Optional: C / C++ – system-level understanding

## Responsibilities

- Design, develop, and maintain software applications
- Write clean, efficient, and well-documented code
- Work with databases using SQL
- Collaborate with team members to plan and implement features
- Debug and optimize existing systems
- Follow best practices in software development

## Qualifications

- Bachelor's degree in Computer Science or related field (or ongoing study)
- Strong problem-solving skills
- Basic understanding of data structures and algorithms
- Ability to learn new technologies quickly
- Good communication skills
